

The Red, White and Blue 27-hole routing from 1928-1948

1939 Dallin Aerial

The Championship Course - Holes 1-9 were known as the Red Nine and holes 10-18 were known as the White Nine

1931 Words by William G Bower, Chairman of Golf Committee, and Sketch's by William Herbert Sickels, member

Hole 1 – 375 yards - Straightaway

Tee shot must be up to carry about one hundred yards off rough in which lurk several large grassy mounds. The fairway develops from a flat beginning to a gentle slope falling off to the left. Drive must be kept to the right of center to gain advantage of downhill roll. A slightly meandering brook guards the entire left border of the fairway. Off to the right about two hundred yards are three large gaping traps to catch a slice. The second shot cannot be topped without fear of reaching a small creek which crosses the fairway about fifty yards in front of the green. A pushed or pulled second will get the traps to the right or left of the green. There are no hazards directly in front of in back of the pin. Two good shots make the hole easy.

Hole 2 – 215 yards -A One Shotter

A good spoon or long iron depending upon atmospheric conditions. Trap in middle of fairway to stop a muffed scooter. Larger shallow trap in front of green to catch the under clubbed shot. To Left is a deep trap which yawns for a hook to the left of center. Too severe a pull will catch the creek which fringes the lower end of the hole. The green is large and flat. A converging slope from the right guarded by two small traps assists the shot played to the upper side of the green. A slice on this hole is almost certain to go out of bounds. Boundary runs the entire length of the hole.

### Hole 3 – A Three Shotter

A fine dog-leg to the right. Tee shot dare not be pushed or sliced to right without penalty from series of large traps and group of trees. Tee shot should be kept to the left center. Plenty of distance for a smacking second shot. Green opens from the left. It is narrow in width but long. A sever pit guards the entire left side. An easy approach from the right is blocked by a deep trap and sloping green. Due to the width of green a ball exploded from either trap must be perfectly played to prevent criss- crossing the green. Tow well played long shots make the opportunity for a birdie excellent.

### Hole 4 - A Drive and a Pitch

Another dog-leg bearing to the right. A boundary guards the entire right. Tee shot should be played straight out with no temptation to hug along the series of traps which jut out at the elbow to the right. A hook will catch trap to left. The second shot on this hole should be accurate. If pushed or pulled severe traps flanking both sides will cause difficulty. An over played second will go over the plateau green down an eight foot slope into heavy rough. A long tee shot on this hole paves the way for an easy par.

### Hole 5 - 380 yards Drive and Mashie Iron

Straightaway with boundary hugging very closely to the right. Tee shot must be accurate. A long series of shell-hole-like traps guard the left as far as any driver can carry. The second shot will be a problem on this hole. Two well placed traps permit only a very narrow entrance for a run-in shot. A boundary about fifteen yards in back of the green will penalize the over carry. This green is rather fast and only well hit "back spinner" will hold.

### Hole 6 - Drive and Spade

A dog-leg to the right. Tee shot determines score on this hole in most instances. Hole favors the long hitter. An infirm shot pushed to the right or slightly sliced is bound to become stymied by a heavy cluster of high trees which shut off the green from sight. A topped tee shot from the slightly elevated tee is apt to come to rest in the gully directly ahead. A hefty smack to the left of center of the fairway will open the green. The second will stand no flukes. It must carry a broad creek passing across the front of the green and be sufficiently accurate to miss four large traps which guard the three remaining sides. The short tee shot faces a sporty second over the high trees which guard the right side. This hole will cause trouble, it is tough but smart, troublesome but fair.

Hole 7 – 265 yards – Par 4 Drive and Pitch.

A straightaway with green gradually rising to the left. A cinch in appearance from the tee but a Waterloo for the careless tee shot maker. Accuracy and not distance counts. A creek to catch the flubbed top and large tree to grab the “skyed” pull. Too severe a hook, if it dose not go out of bounds over the fence boundary to the left, is apt to drop behind the barn and sheltering trees in that area. A sliced or pushed wood may likewise find difficulty in the creek and heavy timber growth which flank the right. There is a great temptation to go for the green but only a tremendous drive with super accuracy will be successful. A severe trap guards the left and gets assistance from a shallow mate at the right. An over shot can easily go out of bounds. There will be many “birds” and “buzzards” on this hole.

Hole 8 – A One Shotter

Tee is slightly higher than level of somewhat sloping green which is surrounded by traps, some sever and others shallow. A side hill putt is apt to give difficulty.

Hole 9 – 480 yards - A Three Shotter

Straightaway 480 yards, partly up hill. Tee shot must be kept in air to clear a sudden incline which blocks view of hole from the tee. Trap to the left and an exacting boundary to the right through the entire distance of the hole. Two well hit woods on a straight line will yield a position for an easy run-up or pitch shot. Green is large and somewhat undulating. Shot to the green dare not be too strong or it will reach boundary line bordering rear.

Hole 10 - 430 yards - Drive and Spoon

A premium is placed on the long tee shot straightaway. An ugly pair of traps guard both the right and left sides of fairway preventing an out to the green. The average tee shot will face a blind second which must be hit all the way to escape a wide creek passing across the entire front of green. A shallow trap to the right and left permit no off direction. The hole not only penalizes the under played but also the overplayed shot. A shelf-like embankment awaits any ball crossing the upper side of green. This hole will stand no carelessness.

Hole 11 - 445 yards - Drive and Spoon or Long Iron

Straightaway, 445 yards, requiring two well hit long shots. Length is all that is required. Besides two large traps on each side of the fairway so placed to catch the long but crooked shots, a border of rugged rough trims the entire length of fairway. The green is abnormally large. Slight rolls and upheavals present a problem for the putting.

Hole 12 - 145 yards - A One Shotter

Hole presents a beautiful test of accuracy. Due to the severe slope from the left side of the green, it is well to favor the contour from the tee. Traps guard fore-left, left and right. To lend assistance is a large old cherry tree guarding the fore-right. Undulating uphill green requires a fine touch.

Hole 13 - 310 Yards - Par 4 - Driver and Mashie-Niblick

Straight out, 310 yards. Drive must be kept to left of center to avoid large yawning sand trap which almost severs fairway in half. A broad jutting trap guards the fore-right and right of green. Flanking the left is a shallow pit with precipitous sides. The second must be pitched with plenty of bite if drive is anywhere but perfectly placed to the left. An over played second which crosses the green if too firmly hit is apt to go out of bounds.

Hole 14 - Par 5 - A Three Shotter

Straightaway, over a deep gully which permits cutting of considerable distance for the long hitter. Trap to the right and left. A shelter of trees jut from both the right and left to narrow the fairway at midway. The long hitter will be in position to put a straight second on the green for a bird. Two broad expanses of sand border the green. A hefty heaven pulled to the left may easily get the boundary. A good drive, a long straight second, and a package of Chesterfields.

### Hole 15 - 350 yards - Drive and Spade

Slight dogleg to the left but grief for the one who tries to hug too snugly along the port side. The same series for shell hole like pits border the left. A gently sloping fairway favors these traps. No fear from the right. Second must be pitched to a slightly undulating green. Large traps present a hazard to entries from off the line. Once the drive has come off satisfactory only a good pitch will yield a par.

### Hole 16 - 490 yards - A Three Shotter

Straightaway, 490 yards to a beautifully shaded undulating green. Shots skirting the right have a plenty of trouble in store. An expansive trap, border-line of trees and heavy rough impair progress. To the left seems offline. Only heavy rough is to be feared in this direction. The second must be well directed to enter the bottle neck-like entrance formed by a heavy timber growth. A row of saplings mixed with older growth and small shallow traps guard the right side along the green. A safe par can be made with little fear, but the try for one under has its hazards.

### Hole 17 - 160 yards - A One Shotter

One of the sportiest holes on the course. The green, somewhat elevated from the tee level, openly flaunts a challenge to the one who can't shoot straight. A group of cruel, clam shell-shaped, deeply pitted traps lay in front to catch the under clubbed tee shot. To the left is a large yawning expanse of sand fringed with over hanging embankment. To the right is a sever slope which has its ending along side a lake. Rugged rough slopes off the rear from which a ball must be played to a down hill leaning green. An excellent test of golf.

### Hole 18 - 310 yards - Drive and Pitch

Staring you in the face at the tee is a miniature lake. You make sure to be over but sometimes one tops the ball. An exacting border in the form of a creek skirts the entire left. "Three trees," play their part on this hole. Any shot to the right center is going to require a very high pitch over the trees to reach home in two. A guard of four severe pits check any short approaches. The rear claims a broad shallow pit. Only a fine pitch shot to a treacherous green will be safe. A beautiful and restful hole to complete your round on.

The Blue Nine – 3110 yards - Par 36

This nine played easier than the other two nines and also helped keep beginner and slow players off the regular course. One unusual feature is that there were three 3 pars, three 4 pars, and three 5 pars. Unfortunately, since the blue nine was not highlighted in the 1931 Philadelphia Armature program we do not have pen sketches or the descriptions for it from that era. Following is from Wilbur Germain's notes on the holes in 1973.

Hole 19 – 230 yards – Par 3. Tee off from where the present practice putting green is to the green at the corner of the driveway and West Chest Pike. With the tee and green both facing parallel to the portion of the driveway they were adjacent to, it almost made the hole a dogleg par 3.

Hole 20 – 365 yards – Par 4. Tee at the corner of West Chest Pike and Manoa Road and play along Manoa Road to the green behind the present 3<sup>rd</sup> tee.

Hole 21 – 420 yards – Par 4. Tee behind the present 2<sup>nd</sup> green against the fence. Play along the right-hand boundary to the green partly hidden in the woods.

Hole 22 – 495 yards – Par 5. Tee is straight across Steel Road from the 21<sup>st</sup> green cut out of the woods. The green is at the far corner of the property which is where the Presbyterian Church is now located. Concord Ave. is now to the right of the right-hand boundary of this hole.

Hole 23 – 480 yards – Par 5. Tee is to the left of the 22<sup>nd</sup> green and the hole is a slight right-hand dogleg to the green besides the present 5<sup>th</sup> tee which is hidden by the woods.

Hole 24 – 310 yards – Par 4. Tee from behind the 23<sup>rd</sup> green around a short sharp dogleg to the right to the green cut out of the woods beside the 22<sup>nd</sup> tee.

Hole 25 – 145 yards – Par 3. Tee is on the clubhouse side of Steel Road near where the house is behind the present 2<sup>nd</sup> tee. The green was between the back of the present 4<sup>th</sup> tee and Steel Road. The actual length of the hole was about 110 yards.

Hole 26 – 460 yards – Par 5. Tee off from behind the present 3<sup>rd</sup> green to the green at the back of the present 3<sup>rd</sup> tee.

Hole 27 – 205 yards – Par 3. Tee was to the golfers right of the 26<sup>th</sup> green and the green was where the shallow end of the swimming pool is.

LOCAL RULES

Penalty for out of bounds shall be loss of distance only.  
**19th Hole**—Ball unplayable by reason of walk, road or shelter may be dropped on the far side of the road without loss.  
**20th Hole**—Ball driven from tee into creek or rough on the bank to the right of bridge may be dropped back without loss.  
 Ball driven from tee into creek to left of bridge can be dropped back for loss of one stroke.

---

**LOCAL RULES**

Penalty for out of bounds shall be loss of distance only.

1st and 2nd Holes—Creek is a parallel hazard. Ball may be dropped on right side of creek. Penalty one stroke.

17th and 18th Holes—Creek is not a parallel hazard. Ball must be dropped keeping hazard between ball and hole. Penalty one stroke.

19th Hole—Ball unplayable by reason of walk, road or shelter, may be dropped on the far side of road without loss.

20th Hole—Ball driven from Tee into creek or rough on the bank to the right of bridge may be dropped back without loss. Ball driven from Tee into creek to left of bridge can be dropped back for loss of one stroke.
